EMERGENCY ROOM VISITS AS A RESULT OF ENERGY DRINK CONSUMPTION

Update on Emergency Department Visits Involving Energy Drinks: A Continuing Public Health Concern

In Brief

- The number of emergency department (ED) visits involving energy drinks doubled from 10,068 visits in 2007 to 20,783 visits in 2011
- Among energy drink-related ED visits, there were more male patients than female patients; visits doubled from 2007 to 2011 for both male and female patients
- In each year from 2007 to 2011, there were more patients aged 18 to 39 than patients in other age groups involved in energy drink-related visits; however, the largest increase was seen among patients aged 40 or older, for whom visits increased 279 percent from 1,382 visits in 2007 to 5,233 visits in 2011
- In 2011, more than half of energy drink-related ED visits involved energy drinks only (58 percent), and the remaining 42 percent involved other drugs

Figure 4: Emergency Room Visits[JPG] (SAMHSA 2013)

CONCLUSION

- THE ADVERSE EFFECTS OUTWEIGH THE BENEFITS.*
- ENERGY DRINKS SHOULD BE REGULATED AND REQUIRE LABELING.*
- CONSUMPTION SHOULD ONLY BE DONE BY ADULTS.*
